

This is a sample of the Church Health Assessment scores with visual charts.

**THIS IS AN OLDER VERSION!**

The newer version has more questions.

The Church Logo goes here

Add the points from all the statements and put the total here.

TOTAL: **Avg-195**

SEE WHERE YOUR SCORE FALLS IN THE FOLLOWING DESCRIPTIONS:

**240 TO 250:**

The church is displaying clear signs of moving toward great health. We estimate that less than 1 percent of churches will score this high. A church in this category should keep doing what it is presently doing.

**200 TO 239:**

The church has significant potential to move to the healthiest level. Leadership should look at those statements that did not score a 5 and see what remedies are possible to move to a higher level.

**175 TO 199:**

A church at this level needs significant work to move into the healthy category. So many deficiencies exist that multiple remedies are needed. Though the church should seek to move all statements to a score of 5, it particularly needs to give attention to those statements that were scored 3 or less.

**50 TO 174:**

Any church that has a score this low is very unhealthy. The possibility of moving to health, outside of miraculous intervention, is remote. The church should begin focusing on the many statements where a score of less than 4 was assigned. Though nothing is impossible with God, we rarely see churches in this category have any significant growth or meaningful ministries.
